Cancer Foundation Hospital

A Project of The Cancer Foundation

اُمید

Newsletter Vol I 02

The Cancer Foundation is a not-for-profit organization registered with the Securities and Exchange Commission of Pakistan (Under Section 42 of Companies ordinance 1984), with the main objective of making cancer treatment available to everyone, without any distinction, at an affordable price. It brings together a team of like-minded people; entrepreneurs, business managers and doctors with a unique philosophy to achieve its mission.

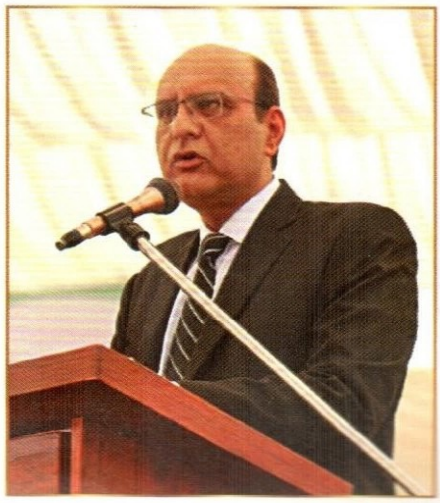

CFH has 100 inpatient beds (27 critical care beds), 18 chemotherapy bays, 3 endoscopy suites and 3 operating rooms. There is an outpatient clinic with 12 examining suites. The radiology department offers 3D digital mammography (first one in Pakistan), CT scan, ultrasound, conventional imaging and Spect CT. Radiation therapy is planned for the next phase. There is a sophisticated laboratory with robotic assembly lines for high throughput and histopathology labs which will be commissioned later this year along with molecular and genetic testing facilities. The hospital provides chemotherapy at highly subsidized rates. Complex cancer surgery for liver, pancreas, gut, gynecological, soft tissue, endocrine and head & neck malignancies are offered. Allied medical specialities like internal medicine, gastroenterology, nutrition, anesthesia pain management and palliative care is offered.

The hospital has a sophisticated IT infrastructure which ensures a paperless workflow using electronic medical records for storage of all data. Remote access to patient data is available to physicians and patients. The hospital exemplifies the 'smart hospital' with telemedicine capabilities and remote access.

Message

Dr. Waheed Jumani

Director Administration

In our pursuit to ensure no cancer patient is left behind, Cancer Foundation Hospital continues to expand its clinical capabilities and patient care services. Over the past years, our focus has been to blend medical excellence with affordable healthcare, ensuring every patient receives quality treatment in a compassionate environment.

Our commitment extends beyond providing advanced technology; it lies in building a system where financial limitations do not dictate a patient's chance at recovery. As we look ahead, we remain deeply grateful to our medical team, staff, and generous supporters who make this vision possible every day.

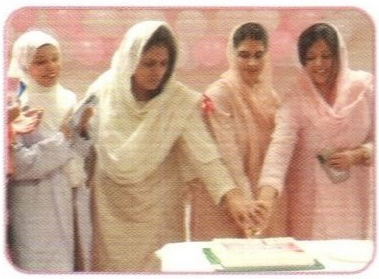

Breast Cancer Awareness

Cancer Foundation Hospital conducted Breast Cancer Awareness Sessions at Lady Dufferin Hospital, FIO Eye Hospital, Hamdard University, Zip24, AGP Pharma, and more, focusing on self-examination, screening, and timely care.

Mammogram

Cancer Foundation Hospital welcomed a generous donor and his family for the inauguration of a new mammogram machine. This contribution will support early breast cancer detection and enhance diagnostic care for countless patients.

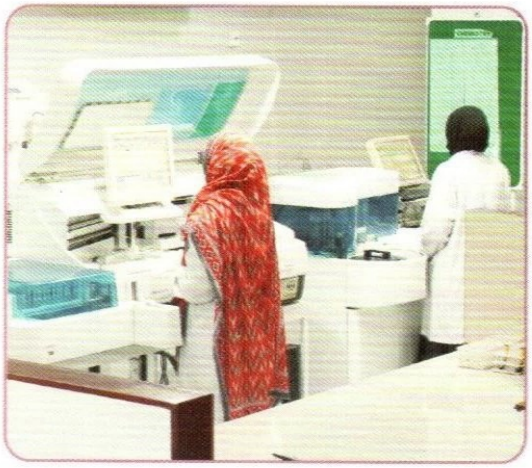

Lab Renovation

Cancer Foundation Hospital renovated its laboratory to improve the working environment and strengthen its diagnostic facilities. The upgraded space will support efficient laboratory services and better patient care.

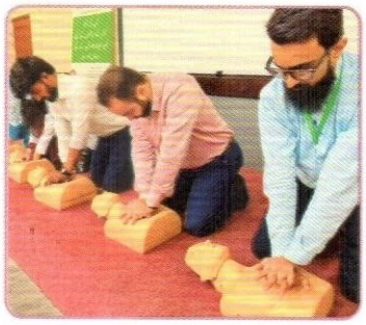

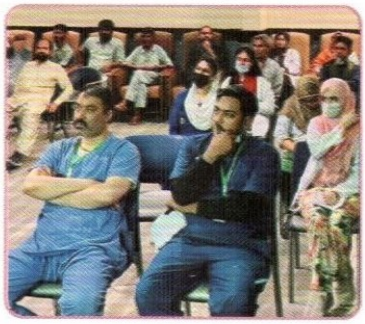

Basic Life Support (BLS) Training Session

Hospital, in collaboration with Pakistan Life Saving Foundation, conducted a Basic Life Support Training Session for employees. The session focused on essential life-saving techniques and emergency response skills.

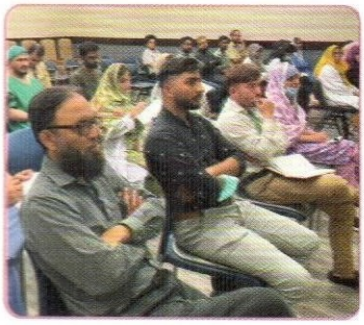

Cold Chain Management & Anti-Counterfeit Solutions

Cancer Foundation Hospital held a seminar on Cold Chain Management and Anti-Counterfeit Solutions for oncology medicines, focusing on safe handling, storage, transport, and prevention of counterfeit products.

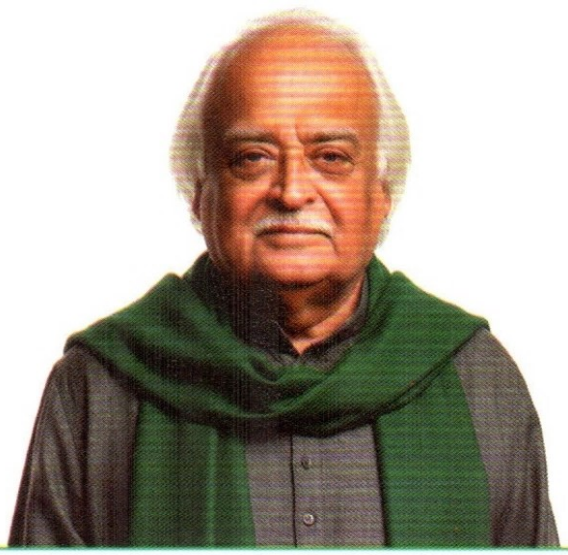

Head & Neck Cancer Support Program

Cancer Foundation Hospital hosted a Head & Neck Cancer Support Program, bringing together patients, survivors, and families to connect, share experiences, and support each other in their journey.
